TAPP Smart Labels
by Arcoflex

arcoflex

*"remote monitoring
and control
for agriculture
and industry"*

Arcoflex TAPP Smart Label is an item identification slip that contains more advanced technologies than conventional bar code data. The most common enhancements in smart labels are QR codes, Electronic Article Surveillance (EAS) tags and specially configured tags. Remotely monitored via smart phone. This will ensure tracking and monitoring of vital product information, from farm gate to store.

Our real time monitoring systems have helped our clients by real time monitoring and real time data about their product.

Arcoflex TAPP Smart Cards The Most Powerful and Cost Effective On The Market

Our remote monitoring systems collect, analyse and disseminate data in real time from anywhere. Dashboards can be customised to your specific farm, logistics and business requirements and will scale and adapt to suit your operation. Developed with state-of-the-art sensors and sophisticated Cloud based aggregation tools, Arcoflex Tapp smart labels has the following capabilities:

- **Records temperatures as determined in any time intervals.**

- **When tapped, the exact geographic coordinates of where, including the address is recorded.**

- **Long Battery Life.**

- **100% water proof options.**

- **Food safe certified and fully biodegradable.**

- **They can be linked to grower ID, variety, commodity and more.**

- **The labels are printed with custom logos, instructions, owner information and more.**
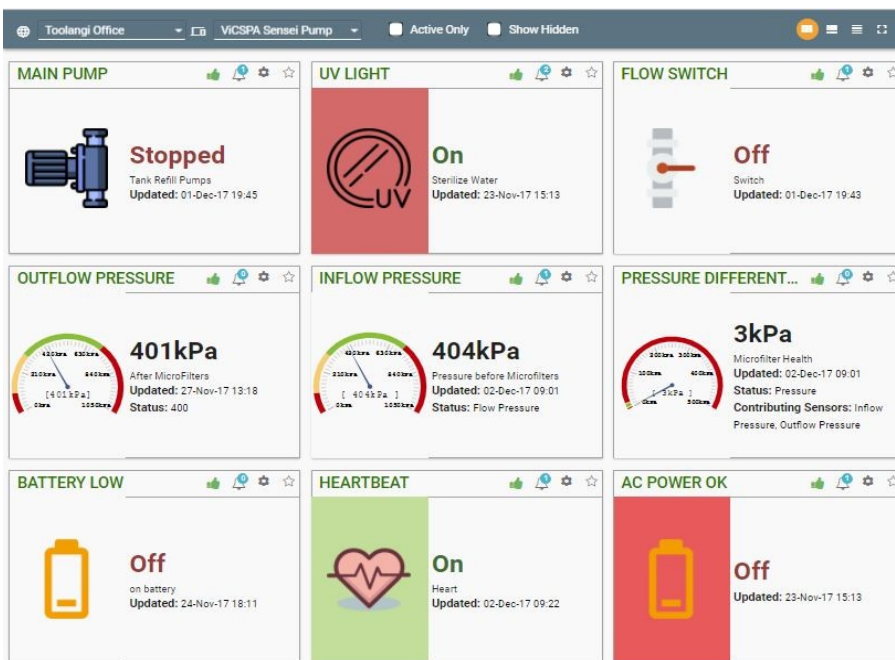

- **Data is automatically uploaded and reports automatically generate, in real time.**

- **Cost effective.**

- **Insurance and legal benefits.**

- **Future labels will incorporate shock, vibration, humidity and gases.**

Visualisations with Arcoflex

All Arcoflex installations come with an easy to read dashboard. At a glance, monitor all configured sensors and assets. Provide real time notification of exceptions by SMS or email, giving you the flexibility to update and optimize alerts and dataflow in real time.

How it works

The Arcoflex gateway unit connects to the internet via built in GSM and provides GPS services. Each geographical site is represented in a customized dashboard. With multiple control units, sites can be managed separately or combined into aggregated units. You can report across multiple units or sensors to achieve aggregated reports for commodities or group your sensors into zones.

With customisable features and solutions for modern agricultural and industrial operations, Arcoflex can significantly reduce product and asset risk and increase productivity, and therefore, profits. Call us today on 03 9762 6155. Find out how your business can benefit using Arcoflex's combined 30 years of experience with automation and monitoring software and solutions.
